

## **Press Release**

Chris Boyd, President of Utility Service Co., Inc. (USCI) announces the acquisition of Conrady Consultant Services.

Conrady utilizes underwater remotely operated vehicles (ROV) for inspecting all styles and types of ground and elevated tanks. ROV inspections provide both economy and convenience to the inspection process. Conrady brings over twenty five years of experience in the potable water industry to USCI.

USCI provides comprehensive and highly valued solutions for potable water quality management along with asset management programs for potable water tanks through the application of unique technologies and professional maintenance programs. Proven programs combined with the development of new and innovative products and services result in total solutions for the owners of potable water distribution systems.
